

Revolutionizing Autorack Lighting for Effortless Automobile Loading and Unloading

Welcome to INPS Rail Solutions

We're illuminating the path to safer and more efficient automobile loading and unloading on Rail. Introducing our cutting-edge Autorack Lighting system – the ultimate solution for seamless automobile transportation.

Did you know that nearly 75% of the new cars and light trucks purchased in the U.S. are transported via freight rail each year? That's a massive responsibility, and it's a responsibility we take seriously. Our **Autorack Lighting** system is designed to revolutionize the way railcars are prepared ahead of loading automobiles, ensuring a smoother and safer process.

Imagine a scenario: it's dark, you're preparing to load an automobile into a railcar, and you're armed with nothing but a flashlight clenched in your mouth. Or maybe you're sticking your head out the window, desperately trying to align the auto inside the railcar while ensuring safety and avoiding any potential damage. It's a challenging situation, to say the least. But with INPS **Autorack Lighting**, these struggles become a thing of the past.

Say goodbye to makeshift solutions and hello to efficiency and safety. With INPS Autorack Lighting, you can enjoy the following benefits:

Precision Loading and Unloading: Our lighting system ensures that you can accurately position vehicles within railcars, minimizing the risk of damage during transit.

Enhanced Safety: Loading and unloading automobiles in poorly lit conditions can be dangerous. Our lighting solution illuminates the railcar interior, providing a safer working environment for your team.

Streamlined Operations: No more struggling with handheld flashlights or risky maneuvers. Our lighting system makes the entire process more efficient, reducing loading times and increasing productivity.

Compatibility: Our lighting solution is designed to serve the majority of automobile manufacturing plants across North America, including those in Georgia, Illinois, Indiana, Ohio, and Texas. Wherever you are, **INPS Rail Solutions** has you covered.

Flexibility in Power Options: Power your Autorack Lighting using a mobile generator or a simple plug into a receptacle. Enjoy convenience and versatility without compromising on performance.

We understand the unique challenges faced by the automobile transportation industry, and our mission is to provide innovative solutions that address these challenges head-on. With **INPS Autorack Lighting**, you're investing in a brighter, safer, and more efficient future for automobile rail transportation.

Our state-of-the-art lighting solution is a game-changer in the automobile transportation industry. Say goodbye to flashlight struggles and hello to seamless, illuminated excellence.
