

LED Control Panels

INPS's Backlit Panels on **Control Boards** are manufactured with **acrylic, laser cut** to shape with an embedded **LED Lighting**.

INPS Illuminated Control Panels are **durable, easy to clean,** require **minimal power** and are **simple to install.**

- One of the thinnest LED Control Panels on the market, measuring at 7mm.
- Light-weight panels.
- The panel's face is illuminated from within using eco-friendly LEDs that require minimal energy and have a long lifespan of around 25,000 to 50,000 hours (12 or 24 volt available).

Illuminated LED Control Panels

Our LED Control Panels combine **functionality** with **modern technology**.

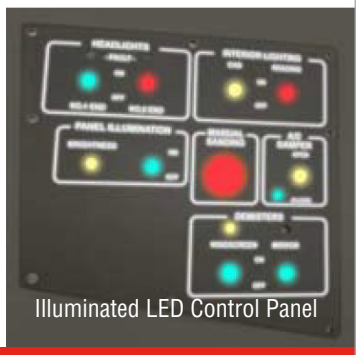

Illuminated Control Panels

The **high-impact acrylic** body and quality paint ensures **longevity** of the product

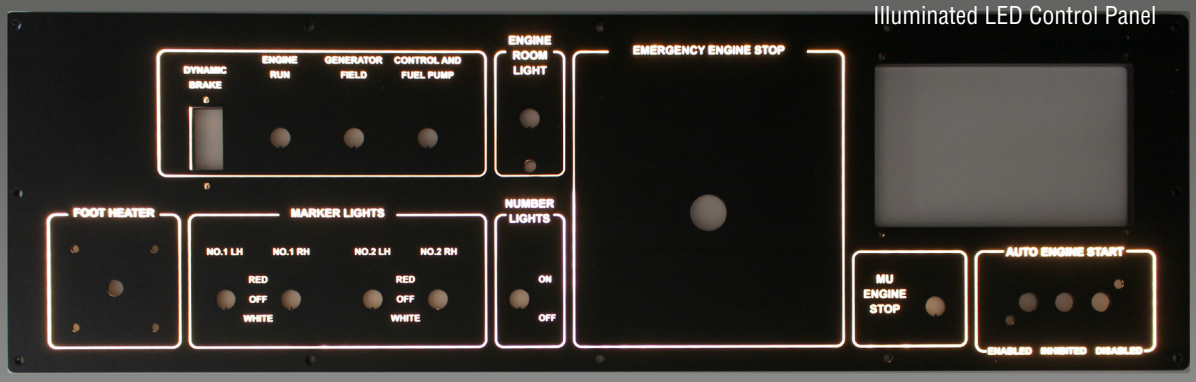

- A thin layer of polycarbonate on the face with a reverse printed side, allows for greater durability and easy cleaning.
- There is minimal restrictions on overall shape and size.
- The LEDs are considered warm white and are easy on the operator's eyes. The addition of dimmer control makes the panel even more comfortable for low-light viewing conditions.
- The painted surface colour can be customized to suit the installation environment.

Illuminated LED Control Panel

An **LED** can use **75% - 90% less energy** to produce the same amount of light as an incandescent bulb.
